

Introduction

Studying Child Development will provide students with an insight into the development of a child from before conception until the age of 5 years old.

Students will develop applied knowledge and practical skills throughout the qualification.

The practical and theoretical elements of the qualification will prepare students for further qualifications in Child Care, Health and Social Care, Physiology, Biology and Sociology.

As part of this qualification, students will study the following three mandatory topics:

- Health and well-being for Child Development (written exam element)
- Understand the equipment and nutritional needs of children from birth to five years (controlled assessment element and a practical)
- Understand the development norms of a child from birth to five years (controlled assessment element and practical)

Awaiting guidance on practical elements due to Covid-19 restrictions.

Topics covered in each year group

Year 10
