Essential Skills

Essential Skills

A critical part of effective careers provision is building students' essential skills. These are the skills that underpin success in the classroom and the world of work such as Teamwork, Problem Solving, Speaking and Listening. Students need to be able to recognise their skillset and talk about it confidently too. They will probably be using them already in your lessons, but this can be a confusing space, with lots of overlapping terminology.

The Skills Builder Universal Framework has been developed by The Careers & Enterprise Company, [Skills Builder Partnership](#), Gatsby Foundation and others to address this problem.

The Framework breaks down eight essential skills into 16 teachable steps. It outlines a roadmap for progress, giving educators and employers a common language for talking about the skills that are essential for employment. [You can explore the Interactive Framework here.](#)

As a teacher, you can also create a free account on the [Skills Builder Hub here](#). There's over 300 short lessons and a suite of other resources too. We have picked three essential skills that are likely to come up in your lessons. These short lessons are perfect for pastoral time and starters/plenaries.

Careers in the curriculum

Careers in the Curriculum

Young people critically need support to see and understand their future and ensuring that careers learning is delivered in all subjects has benefits clearly aligned to the priorities of schools and colleges and to positive outcomes for students. There are three different approaches to careers in the curriculum to consider:

1|

Highlight the relevance of your subject to future careers and opportunities.

2|

Set curriculum learning within the context of careers and the world of work.

3|

Deliver curriculum learning through employer encounters, experiences of work and/or extra-curricular opportunities.

Pathways

Pathways

When it comes to the question of what to do at key decision points, there are a lot of options to consider. Therefore, the Department for Education has put together a couple of simple and handy guides to inform young people and their parents about the options available to them. These include:

- A [route comparison grid](#) which shows all of the routes available after GCSEs, along with additional information on each one, such as the level of study, entry requirements, duration of the course, and where it can lead.
- A [2-minute animation](#) showcasing and explaining each choice in a simple, dynamic and visual manner.

The Department for Education T Levels team has created a helpful [T Level Guide](#) for Teachers and Careers Advisers, giving a comprehensive oversight of this exciting qualification.
